SEWAGE LIFT STATION CONTROL PANEL UPGRADES-PROGRAMMABLE LOGIC CONTROL EQUIPMENT

CHANGES TO SECTION 161010 - ELECTRICAL GENERAL

REVISE: 1.03 QUALIFICATIONS AND REQUIRED WORK

SCOPE A. System Integrator

- 1. The System Integrator shall have on staff a Project Engineer with three years prior experience on similar sized projects. This Project Engineer shall coordinate the technical aspects of this project and prepare the submittals and drawings. The Project Engineer shall attend all coordination meetings when specifically requested by the Engineer.
- 2. The System Integrator (SI) shall meet the following minimum qualifications:
 - a. SI shall be regularly engaged providing electrical and control systems for the Municipal Water and Wastewater Industry.
 - b. SI shall have an Electrical Engineer on staff registered in the State of California as a Professional Engineer.
 - c. SI shall be capable of labeling all electrical panels as manufactured or customized by the System Integrator with appropriate UL label prior to factory testing or shipment to project site.

3. The companies listed below have been determined to meet the minimum qualifications specified in this Section and are pre-qualified for performing work as System Integrators on the project. Other System Integrators may submit a statement of qualifications, proving requirements above, and listing relevant project experience on similar completed projects. Include project references with phone numbers including the Owner, Engineer and Electrical Contractor. See submittals section of this specification section.
